Verification of “Kills 99% of Germs” claim

The report (reference number 456423609 kh) verifies that the product tested is permitted to have the claim “Kills 99% germs” to appear on the label as greater than 2 Log₁₀ reduction (99%) has been achieved over a 20 second contact time for the test organisms *Staphylococcus aureus* and *Escherichia coli*.

Note:

- **Given the above results were achieved under the prescribed directions for use the information on the label must not be misleading to the extent of referring to the product as ‘Instant’ or ‘Instant action’.**
- **The formulation must also remain unchanged as per the tested sample. Recipes with different/ additional fragrances or additives should be assessed as different products.**
- **The term ‘germs’ must only be used in the context of bacteria only and must not give the impression the product will be effective on other microorganism such as viruses and fungi.**
- **The label must not make any reference to bacteria that have not been tested.**
- **It is the supplier’s responsibility to ensure product is compliant as per TGO 104 labelling and testing requirements.**
